
Kmdf Hid Minidriver For Touch I2c Device

[Download](#)

Select the Hardware tab. Click the "Device Manager" button. 4 Find your KMDf HID Minidriver for Touch I2C Device in the list and double-click the icon... 5 In the properties window, click Reinstall Driver. 6 In the Add Hardware window, click Next. 7 Select "Install from a list or specific location" and click the "Next" button. 8 Select Run the Hardware Update Wizard. 9 After installing the driver, click Finish. 10 Close all terminal windows and reboot your system. On this, the description of working with the device was completed, but I could not help but tell you about what it is. From the point of view of hardware, the device is very simple.
