Impressive Game The Elder scrolls Online is a diverse game with a lot of variety. The fantasy setting is, as expected, amazing and the pre-existing lore is already very interesting. The game is set in between the fall of the elven people and the birth of the kalivar (a villainous race) and it is mainly based around the conflict between them (or more accurately the way the orcs are acting). The game consists of two entirely separate worlds: Human lands and Val'kyr's lands. The human lands consists of random places and in-between areas which the player can travel from one to the next. The Val'kyr's lands consists of vast, open, and large flat areas with no obstacles. In between the lands, you will find Abyss Dungeons (levels filled with evil monsters, treasure, and valuable items). While exploring this world, you will come across different areas and unique monsters. These are your typical RPG standard monsters and they will feature in pretty much any RPG game. This game can be played with up to 4 other players. Each player has his own base and can be in one of the 4 roles (soldier, knight, ranger, wizard). This makes it very easy to have specific characters assigned to do specific roles (if you want your wizard to be far away from the main camp). The online multiplayer is

an excellent feature. The only complaint that can be made is that the co-op is only for 2 players. The character speed is on par with single player games. This means that they are not the smoothest in combat, but it is necessary due to the large quantities of enemies that you will face. The character creation is fairly complex, and it offers a wide variety of choices. The player gets to choose his stats, weapons, and items. Once the player has an idea of how he wants his character to play, he can then go and experiment with it. The inventory is mostly composed of food and weapons. This is the only type of item that can use an action skill. This makes it easy to get food and weapons so that you can prepare yourself for the next fight. I did mention that the game is set in a fantasy world. And it is true. The magic system is very generic. You have only 10 spells available and you can upgrade those spells if you desire. The graphics are very good, and they are of high quality.
