Chemical coupling of a nucleobase with deoxyribonucleosides was developed as a new method to prepare ribonucleosides. The reaction was conducted by standard nucleophilic displacement of the methoxy group on the 4'-position of deoxyribonucleosides by a nucleobase or nucleoside. The structural analysis of ribonucleosides was accomplished by nucleoside derivatives with a 4'-deoxy-4'-fluororibonucleoside structure. These compounds were also used as an analytical tool for determination of ribonucleosides in various biological samples. Metadata is everything you know. It contains records of your file and folder names, your computer name, your connection type, your operating system name, etc. All of this important data is passed between computers and the Internet and it makes searching a lot faster for search engines, security tools, and information retrieval and updating. MetaData! We all use metadata and very few of us actually know that we are using it. The term stands for 'data about data', and it is an important part of our Computer World. Metadata is available from your operating system and appears whenever you save a file or open a folder. You can right-click on a file to see the metadata. Additional file information: 0cc13bf012
